Cybersecurity student with hands-on IT experience and a growing focus on security operations, threat detection, and threat hunting. Building practical cybersecurity experience through a virtualized enterprise environment while developing skills in network security, vulnerability assessment, security monitoring, and incident analysis, with the goal of pursuing a career as a SOC Analyst or Threat Hunter.

PROFESSIONAL EXPERIENCE

University of Nevada Las Vegas, Las Vegas, NV

August 2023 – December 2024

Student IT Level 1: Lab Monitor

- Provided technical support to students by assisting with computer, software, and laboratory-related questions.
- Diagnosed and troubleshooted hardware and software issues on campus computers to ensure minimal downtime.
- Maintained printers, including troubleshooting issues and replenishing paper supply.
- Managed the scheduling and tracking of rented study rooms to ensure efficient utilization.
- Maintained a clean, organized, and functional computer lab environment by performing routine inspections and upkeep.
- Assisted in ensuring lab equipment was operational and readily available for student use while providing excellent customer service.

EDUCATION

Western Governors University

March 2025 - Present

Bachelor of Science, Cybersecurity and information Assurance

Sierra Vista High School, Las Vegas, NV

August 2018 – May 2022

High School Diploma

PROJECTS, CERTIFICATIONS, AND TECHNICAL SKILLS

Projects:

Stellaris Tech Simulation Environment

- Designed and implemented a virtual enterprise network to simulate real-world cybersecurity operations, including network security, vulnerability assessment, security monitoring, and threat detection. Utilized VMware, Active Directory, pfSense, Splunk, Security Onion, Kali Linux, Nessus, OpenVAS, and MITRE Caldera.

Certifications: CompTIA Security+ (2026), CompTIA Network+ (2026), CompTIA A+ (2025), ITIL 4 in IT Service Management (2026)

Technical Skills: Security Information and Event Management (SIEM), Identity & Access Management (IAM), Splunk, Firewalls, Virtual Machines, NIST SP 53, Linux, Active Directory, TCP / IP, Network Security, Incident Response, Threat Detection, MITRE Att&ck, Computer Building, Hardware and Software Troubleshooting, Vulnerability Management, Cyber Defense, Cybersecurity
